RE: Administrator's Report

Budget

The budget amendments on this agenda are necessary to balance the current 2014 budget before the end of the fiscal year on April 30. Although some revenues are not realized until after our meeting the intention is to end the year without a budget deficit. The auditors want expenses to be accounted for and revenues described and allocated correctly which we have done our best to demonstrate in this ordinance. Please note that the original FY 2014 budget contained \$154,842.91 in reserve fund revenues, which the staff did our best at the six month amendments to avoid using this entire amount.

The amendment allocates Street and General Fund revenue to repay the enterprise funds, which supplemented the Main Street rehabilitation. The Capital fund was over budget as of May 2013. The line item overages were necessary for operations while the austerity demonstrated at the six month revision allowed us to deliver services to our best ability while protecting the general fund reserves.

Utility Billing Research

Please understand that in the interest of a thorough data mining project, this may take a few weeks. It is my recommendation that any potential changes to our current rate structure should be well evaluated and part of an annual budget. Researching utility rates will be an ongoing project throughout the coming months.

Cloud Research

I have been exploring options for hosting our data on the cloud and moving from an exchange server. Utilizing Google Apps will allow flexibility for working away from workstations and provide continuity of government services for our residents. The savings would be long term as our server maintenance would be reduced while the need to purchase Microsoft Office licenses would be eliminated when we replace workstations. Our financial software, Summit, does not have a cloud solution at this point in time but many municipalities and small businesses are migrating to the cloud and we anticipate that our software vendor will have a solution in the long term.

Code Violations

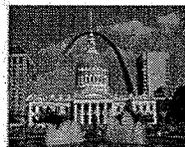

I would like to present changes to the code enforcement ordinance, in the interest of expediting property code violations. The current process is cumbersome and provides for multiple written warnings before a citation may be given. I would propose a timeline along the grounds of citations being given 10 days after written abatement notices are given.

Transportation Planning

The Mid-Missouri Regional Planning Commission (RPC) engaged the Planning and Zoning Commission with an overview of the planning process. It is vital that this Board, Planning and Zoning and the general public participate in the planning process to accurately gauge the community's needs and their ideal strategies for transportation planning. This process is separate from the Livable Streets program but both processes will help facilitate those discussions with the community. I would like to schedule a time for Ed to present to the Board of Aldermen in May.

Board of Aldermen on-boarding

I would like to invite our newest Board members to come by City Hall and meet the staff and ask any questions about City operations they may have. We have an exciting year ahead of us in Ashland and we welcome the opportunity to work with our Board of Aldermen on making Ashland the best community it can be. The staff is preparing a comprehensive staff, Aldermen and volunteer board membership directory for your convenience.

Re: Hwy. 63 Access and Signage

Date: 4/17/2014

The proprietors of the business establishments located in proximity to Douglas Dr. and Liberty Lane by their signatures affixed below formally petition the City of Ashland to request from the Missouri Department of Transportation directional signage near the Hwy. 63, route Y, route M/Broadway interchange. It is our belief this signage will aide clientele in accessing the services available from the businesses listed below. Furthermore it is our belief the Missouri Department of Transportation should provide this signage at no charge to the City of Ashland and/or the aforementioned businesses.

Justification for this request is based on the belief that the elimination of direct access to Liberty & Douglas from Hwy. 63 by the development of the J-turn lanes and other U.S. Hwy. 63 "improvements" has the potential to negatively impact revenues for these businesses and for the City of Ashland as a whole. Directional signage may help offset this potential negative impact.

On numerous occasions the City of Ashland has expressed interest in fostering a climate that draws businesses to the community. In support of the businesses that are already here, it is our hope the city of Ashland will quickly act upon this request by a vote of affirmation from the City Council and will convey this request to the Missouri Department in timely fashion.
